Training Description:

All players will have a 2-hour window as an opportunity to use whatever space they desire between the synthetic shooting area, rapid hands, rapid shot, and open on-ice. This is an opportunity for these players to have fun with each space without the pressure of coaching, work on things on their own and to get creative. VSA staff will be directing kids during this 2-hour window to make sure each space is being utilized equally and effectively. We would like to create a fun environment full of activities for these kids during their day off from school.

Private Lessons/Group Training:

Private Lessons & Private Group Trainings will still be available **outside** of the above 2-hour blocks. Please contact Jack Skille (Director of Hockey) for these individual inquiries.
